

«We are on the way to a green library system!»

Prof. Dr. Durmuş Günay Library

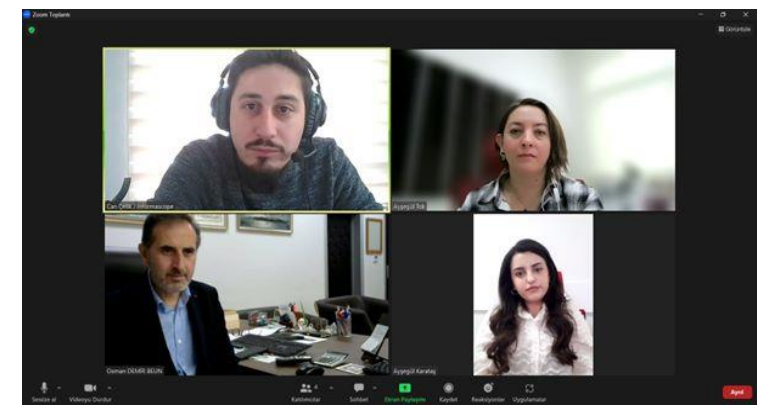

What is a Green Library?

Support open access research

«Digital first» library collection and remote access support

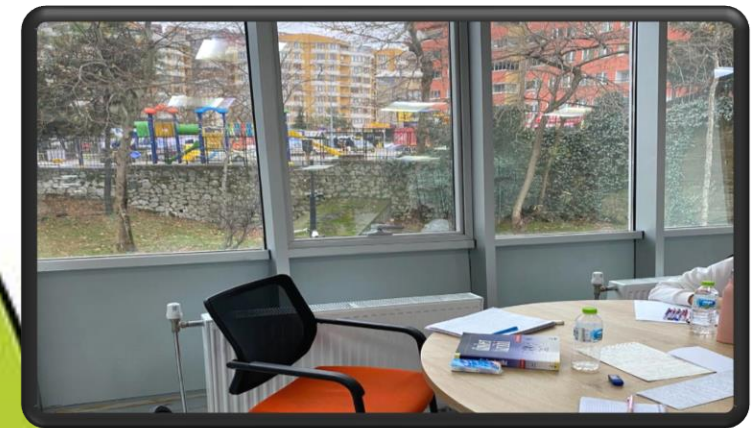

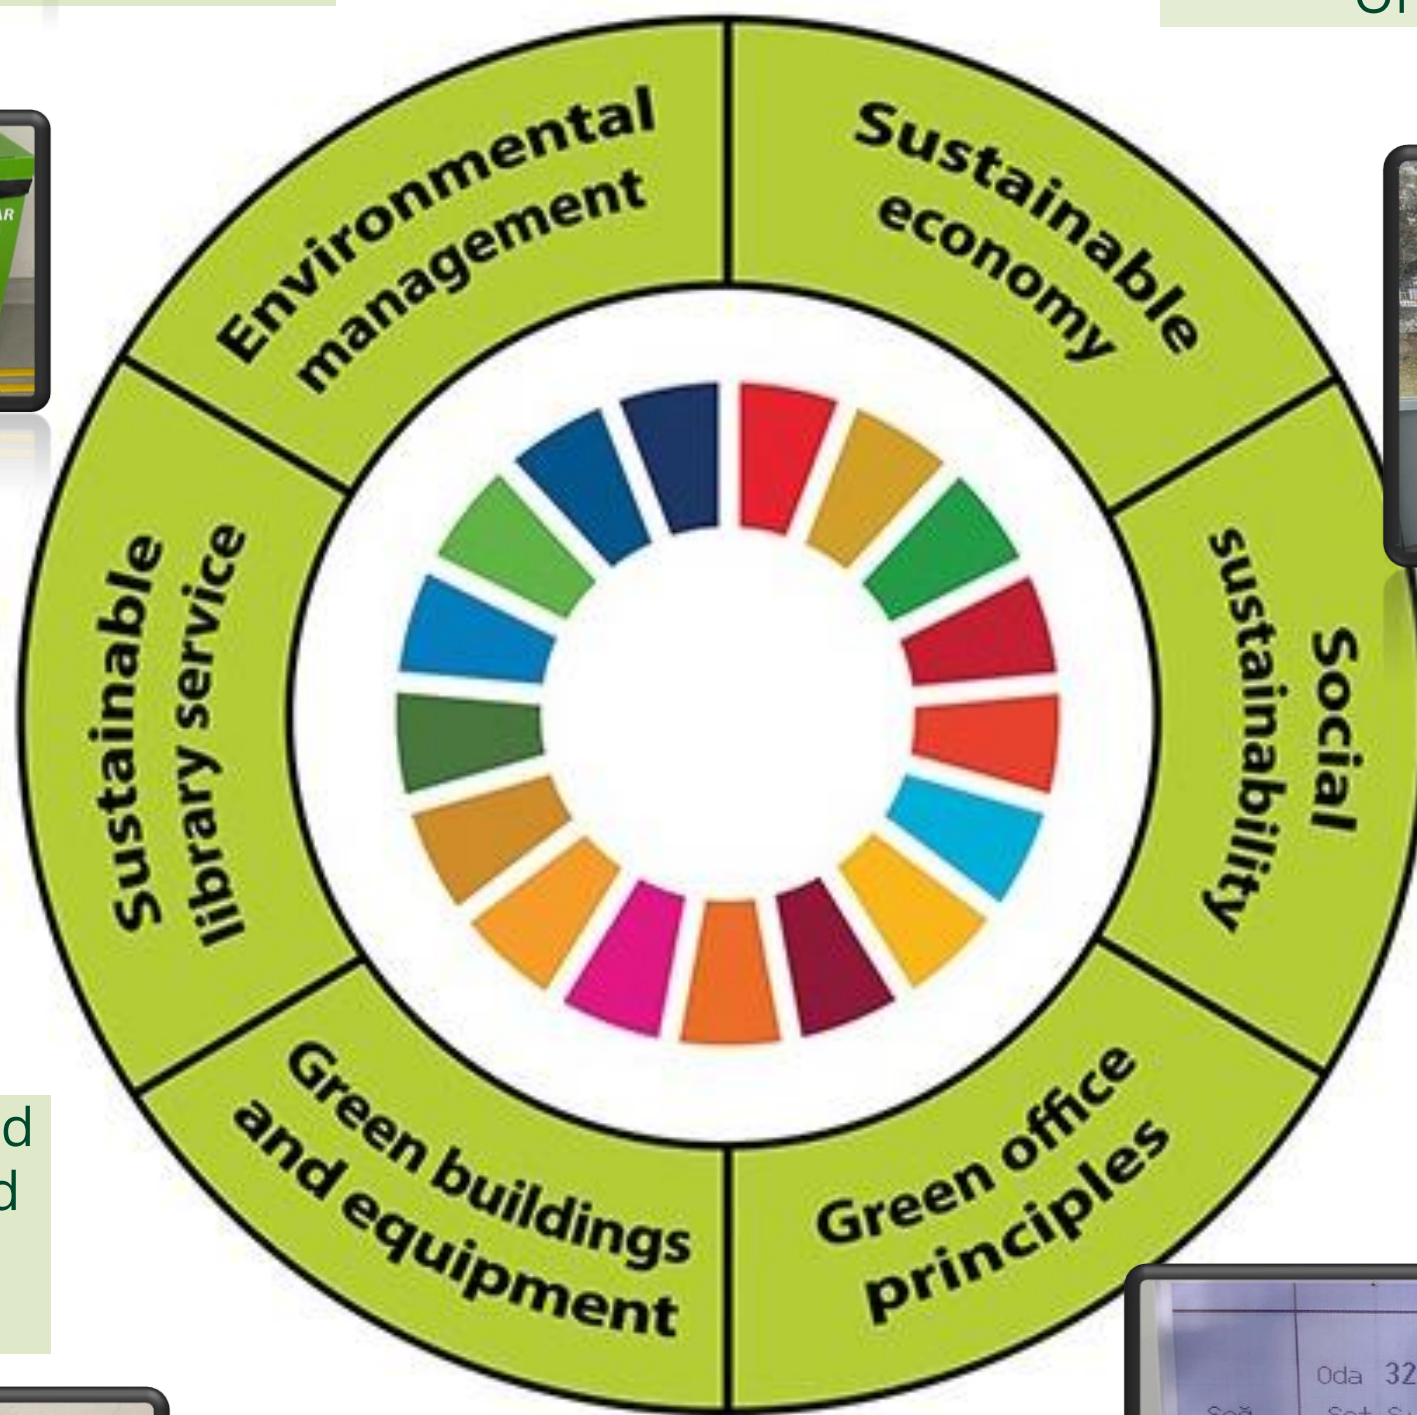

Organize online meetings

Providing containers for recycling

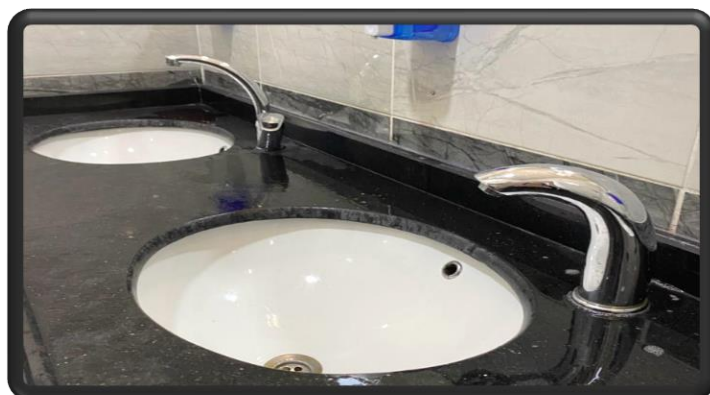

Using digital co-shared documents and cloud System to minimize paper usage

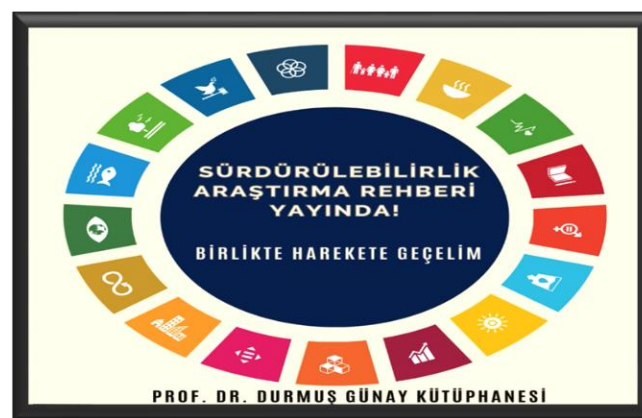

To save energy natural lighting

Using sensor lamps in the library

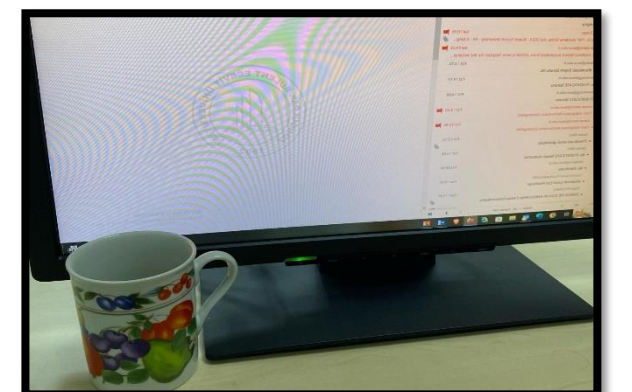

Photocell faucets in every sink

Topic guide and sustainable glossary integrated into development goals are publicly shared

Thermal comfort provider

Use of reusable containers
