National Libraries Section

STRATEGIC PLAN 2010-2011

Mission

The IFLA National Libraries Section is a focal point for supporting the vital role of national libraries in society as custodians of the worlds' intellectual heritage, providing organisation, preservation of and access to the national imprint in all its forms.

The Section aims to provide leadership in the areas of concern to national libraries, always in recognition of the needs and views of every region of the world and in recognition of IFLA's vision as the trusted global voice of the library and information community, driving equitable access to information and knowledge for all.

The Section supports and promotes IFLA's core values to its members:

- The principle of freedom of access to information, ideas and works of imagination and freedom of expression embodied in Article 19 of the Universal Declaration of Human Rights
- The belief that people, communities and organisations need universal and equitable access to information, ideas and works of imagination for their social, educational, cultural, democratic and economic well-being
- The conviction that delivery of high quality library and information services helps to guarantee that access
- The commitment to enable all members of the Federation to engage in, and benefit from, its activities without regard to citizenship, disability, ethnic origin, gender, geographical location, language, political philosophy, race or religion.

The Section's aims and activities underpin IFLA's four key strategies:

- Empowering libraries to enable their user communities to have equitable access to information
- Building the strategic capacity of IFLA and that of its members
- Transforming the profile and standing of the profession

- Representing the interests of IFLA's members and their users throughout the world

In pursuing its goals, the Section will support and promote the President's theme, *Libraries driving access to knowledge*.

A related but independent association is the Conference of Directors of National Libraries (CDNL) which was established to discuss policies and promote understanding and cooperation on matters of common interest to national libraries worldwide. The Section works in close collaboration with CDNL.
