

500 RELATED ACCESS POINT – PERSONAL NAME

Field Definition

This field contains the access point for an authorized form of personal name that is either related to the access point in the 2-- field, or associated with the work described by the record. In the last case it should hold a \$5 subfield with value 'a' on character position 4.

Occurrence

Optional. Repeatable, except when the field is used to carry the name of a creator associated with the work. Any subsequent creator's name should be carried in field 501, 511 or 522, according to whether the name is that of a person, a corporate body or a family.

510 RELATED ACCESS POINT – CORPORATE BODY NAME

Field Definition

This field contains the access point for an authorized form of corporate body name that is either related to the access point in the 2-- field, or associated with the work described by the record. In the last case it should hold a \$5 subfield with value 'a' on character position 4.

Occurrence

Optional. Repeatable, except when the field is used to carry the name of a creator associated with the work. Any subsequent creator's name should be carried in field 501, 511 or 522, according to whether the name is that of a person, a corporate body or a family.

520 RELATED ACCESS POINT – FAMILY NAME

Field Definition

This field contains the access point for an authorized form of family name that is either related to the access point in the 2-- field, or associated with the work described by the record. In the last case it should hold a \$5 subfield with value 'a' on character position 4.

Occurrence

Optional. Repeatable, except when the field is used to carry the name of a creator associated with the work. Any subsequent creator's name should be carried in field 501, 511 or 521, according to whether the name is that of a person, a corporate body or a family.
